Comments:		

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in July, 2005 and no WBCR was observed at any of the five sites evaluated. The stream met both the average and maximum depth criteria at four of the five sites. Several sites were easily accessible and evidence of use (ATV path) was observed at one site. Because the stream meets the depth criteria, is easily accessible, and there was evidence of human use, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
